

AGGREGATE TESTING LAB EQUIPMENTS

provides a complete selection of aggregate testing equipment for classifying and evaluating construction materials in accordance with ASTM, AASHTO and other standards. This includes: material splitters; sieves; screen shakers, as well as Aggregate Impact Value Testing Machine, Buoyancy Balance, Cylindrical Metal Measure, Density Basket, Deval Abrasion Testing Machine, Elongation Gauge, Flakiness Gauge, Jaw Crusher Laboratory type, Los Angeles Abrasion Testing Machine, Riffle Sample Divider, Sand Absorption Cone and Tamper, Sieve Shaker- Gyratory, Sieve Shaker-Hand Operated, Sieve Shaker-rotap etc.. From ASTM testing sieves to moisture testers.

Specific Gravity And Water Absorption Of Aggregates

Riffle Sample Divider

Aggregate Crushing Value Apparatus

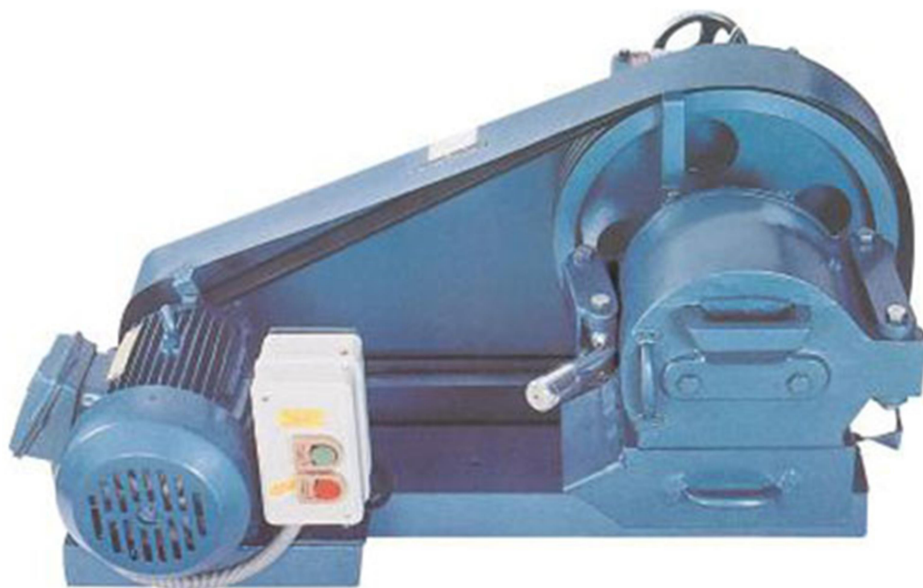

Aggregate Impact Tester With Blow Counter

Devel Attrition Tester

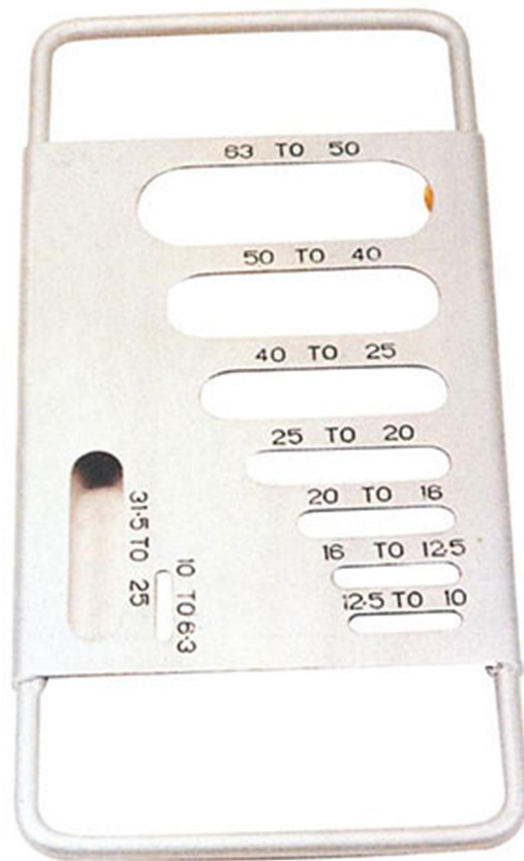

Jaw Crusher

Pulveriser

Tile Abrasion Testing Machine

Thickness Gauge

Length Gauge

Cylindrical Measures

Density Basket

Skid Resistance And Friction Tester Standard

Los Angeles Abrasion Testing Machine

Digital Los Angeles Abrasion Testing Machine

Dorry Abrasion Testing Machine
