

BITUMEN & ASPHALT TESTING LAB EQUIPMENT

provides wide array of modular Bitumen Testing Equipment to accomplish these needs.

Geotechnical testing equipment includes We Supplied comprehensive range of bitumen testing equipment, Asphalt testing instruments comprises of Ductility testing machine, Rolling thin film oven, Core Drilling machine, Ductility Testing Apparatus, Bitumen penetrometer, Bitumen/Centrifuge Extractor – Hand Operated, Bitumen/Centrifuge Extractor – Motorized, Kinematic viscosity bath, Standard Penetrometer, Marshall stability test apparatus, Automatic marshal compactor, water bath for penetration test etc.

we are among the top Bitumen & Asphalt Testing Lab Equipment Manufacturers in India. Our Bitumen Testing Equipment we produce and sell are used from the perspective of engineering, to construct roads, highways, and real estate development among other things. Being among the most desired Bitumen & Asphalt Testing Lab Equipment Suppliers on the marketplace our customers are located all over the world.

Elastic Recovery Mould

Straight edge (3 meters)

Benkelman Beam

Pavement Core Drilling Machine

Standard Tar Viscometer

Marshall Stability Test Apparatus

Mixer With Heating Jacket

Ductility Testing Apparatus

Automatic Compactor For Bituminous Mixes

Loss On Heating / Thin Film Oven

Rolling Thin Film Oven

Asphalt Concrete Cutting Machine

Ring And Ball Apparatus Electrical

Standard Penetrometer

Digital Penetrometer

Stripping Value Apparatus

Centrifuge Extractor Hand Operated

Centrifuge Extractor Motorized

Kinematic Viscometer Bath

Say Bolt Viscometer
