

CONCRETE TESTING LAB EQUIPMENTS

Our concrete testing lab equipments help construction builders to ensure maximum strength development under the ideal temperature and moisture conditions. We have different kind of concrete testing equipments varying from automatic, manual or semi-automatic depending on your specific requirements. SMEW being the best manufacturer of concrete lab testing equipments allows examining concrete cubes, cylinders and blocks to assure en and other international standards. Geotechnical testing equipment includes We Supplied modular and mobile NDT Testing instruments such as Ultrasonic Pulse Velocity Meter, Concrete Cover Meter, Concrete Test Hammer, Cement Testing Instruments, Cement Testing Equipment, Non-Destructive Testing Equipment, NDT Testing Equipment etc.

wide range of top quality and the latest international standard test equipment and equipment to test in concrete equipment for testing in labs or concrete testing equipment cement, soil bitumen aggregate, equipment for rock testing, and laboratory equipment for testing in steel various types of equipment and accessories at affordable prices and prompt delivery.

Digital Compression Testing Machine Channel and Pillar Type

DLC Vibrating Hammer For Concrete Moulds

Fully Automatic Compression Testing Machine with Pace Rate Controller

Flexure Testing Machine Hand Operated

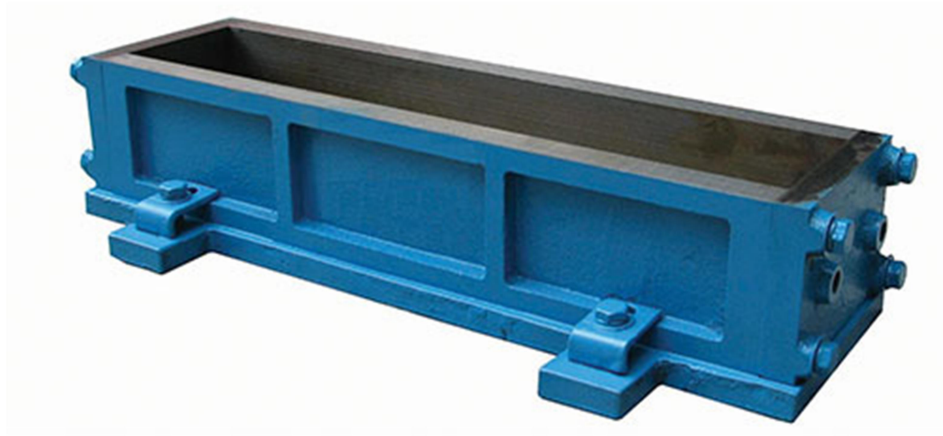

Curing Tank

Vibrating Table

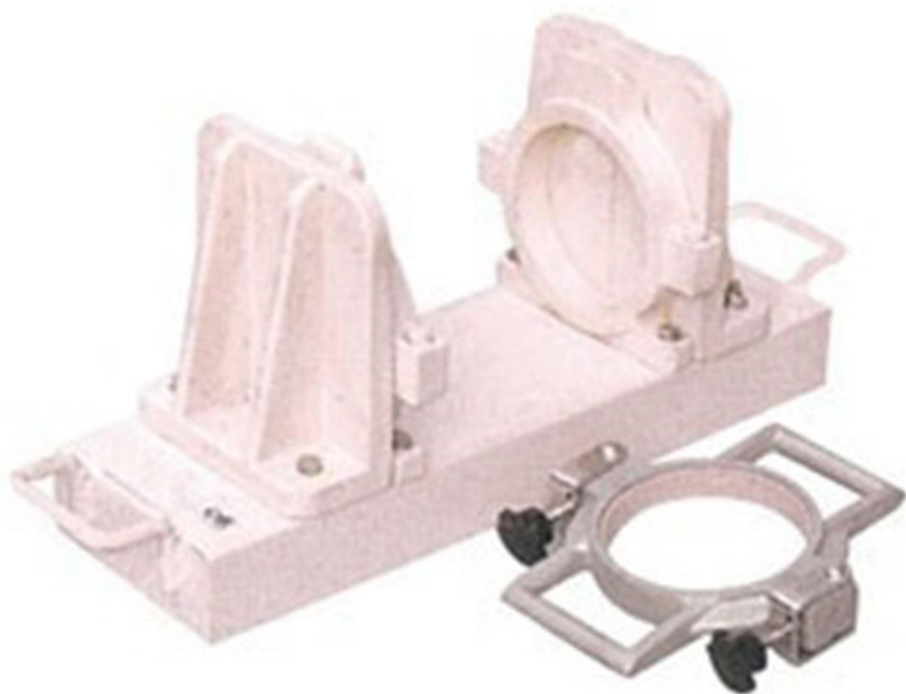

DLC Vibrating Hammer

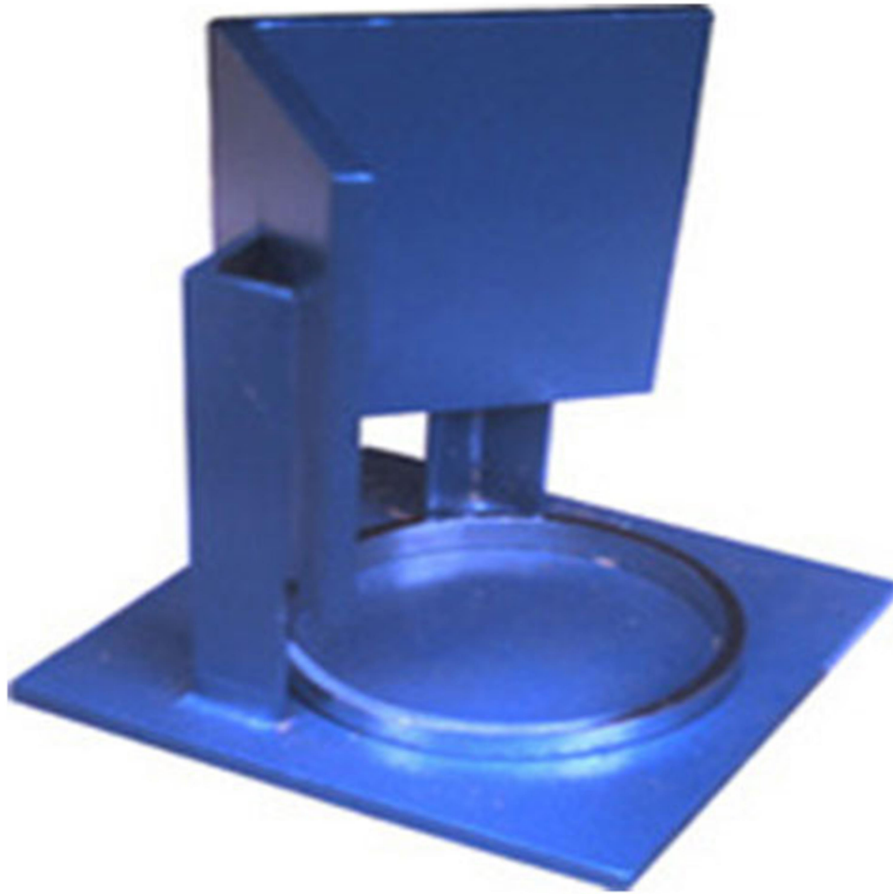

Beam Mould

Cube Mould Three Gang

Capping Set Horizontal

Capping Set Vertical

Melting Pot

Digital Compression Testing Machine

Compression Testing Machine Channel Type Load Frame Electrical Cum Hand Operated

Compression Testing Machine Pillar Type Load Frame Hand Operated

Compression Testing Machine Four Pillar Type Load Frame Hand cum Electrical Operated

Vee Bee Consistometer

Slump Test Apparatus

Kelley Ball Penetration Apparatus

Compaction Factor Apparatus

Laboratory Concrete Mixer

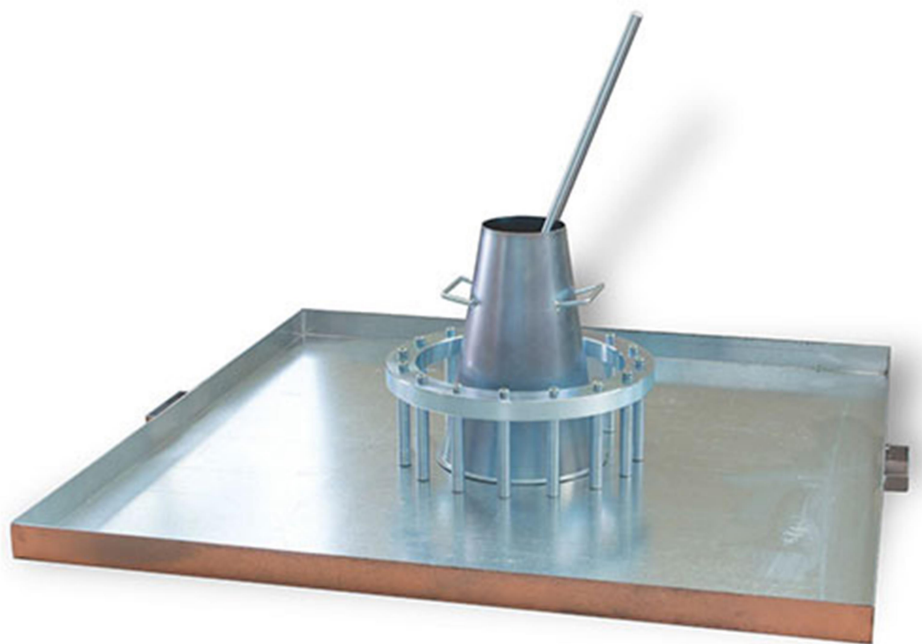

Laboratory Concrete Pan Mixer Machine

Tamping Rod

Tamping Bar

J - Ring, Narrow Gap

Concrete Flow Table Test Set

V - Funnel

L - Shape Box Apparatus

Air Entrainment Meter

Double Beam Screed

Power Floater Machine

Vibratory Plate Earth Compactor

Flexure Testing Machine Electrical Cum hand operated

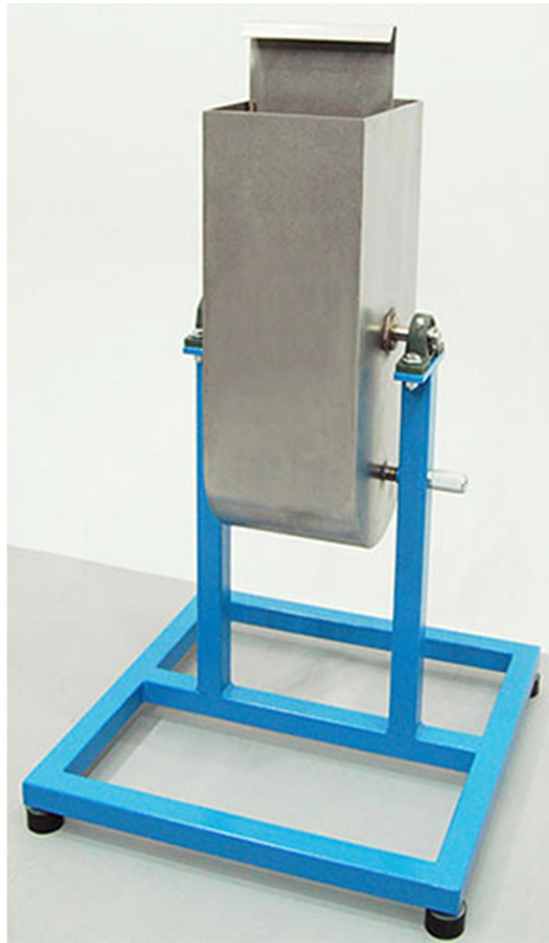

Flexure Testing Machine Power Pack Type

Hydraulic Jacks

Permeability Apparatus Three Cell Model

U-Shape Box Apparatus

Pocket Concrete Penetrometer

Mortar Penetrometer

Bleeding Of Freshly Mixed Concrete

Lateral Extensometer

Longitudinal Extensometer

Density Of Fresh And Hardened Concrete

Compression Testing Machine Channel Type Load Frame Hand Operated

Straight Edge

Cube Mould

Cylindrical Mould
